

Why *RegenUwave* Rather Than A Pill?

- Cure, not temporary fix
- Natural erections without preplanning
- Safe, painless, non-invasive
- 6 quick office treatments
- Freedom from pills, injections and pumps
- No recurring cost
- Restores spontaneity
- Relieves sexual insecurities

Erectile dysfunction is more common than once thought. Although ED is often seen in men over the age of 40, it affects men of all ages. The most common cause is physical in nature and related to blood flow.

The prevalence of Ed increases with age.

- 39% of men at age 40 are affected
- 67% of men at age 70 are affected

Common conditions associated with ED

- *Diabetes *Hypertension *Increased Age
- *High Blood Cholesterol *Cardiac Diseases
- *Smoking *Poor Overall Circulation

What is *RenUwave*?

RegenUwave is an alternative to commonly used pills, injection and pumps to treat Erectile Dysfunction (ED). ***RegenUwave*** is a unique medical treatment, performed with an FDA approved device, **to restore natural, spontaneous erections and to enhance the strength of the erections you currently have.**

The majority of all ED cases are attributed to diminished blood flow. The penis requires healthy blood flow to become completely erect, and even a marginal reduction in blood flow can potentially result in an inability to achieve or sustain an erection.

RegenUwave is a non-invasive, medical treatment that uses acoustic pressure waves, also known as **low energy shock wave therapy**, to induce a physiological response, increase blood flow and deliver growth factors and stem cells directly to the penis. Once blood flow and vascularization is restored, ED is corrected on a cellular level, allowing natural, spontaneous erections without the use of pills, injections or pumps.

Reasons For *RenuWave*

- Achieving or maintaining an erection is difficult (occurs at least 1 in 4 times of attempting intercourse, or persists for a month)
- Achieving an erection takes longer than usual or is more difficult in certain positions
- Erections are weaker or less rigid
- Maintaining erection requires conscious effort
- Morning erections are less frequent or less rigid
- Climaxing occurs more rapidly or with incomplete erection
- Ejaculation is less forceful
- Erection after stimulation takes longer
- Reduced ejaculatory volume
- Longer intervals between erections
- Pills don't work for you
- Pills are inconvenient or too expensive

What to EXPECT with *RegenUwave*

Regenerative Complete is a medical practice specializing in the use of ***RegenUwave*** to correct Erectile Dysfunction and to enhance the strength of erections you currently have. Your initial consultation will be scheduled at our private, discrete medical office. A medical physician will conduct a full history and focused examination to access the cause of your erectile dysfunction, and determine if you are a good candidate for ***RegenUwave***. Once the doctor confirms that ***RegenUwave*** is right for you, 6 fifteen minute treatments will be scheduled over a 3 week period. Most men begin to see changes by the third or fourth treatment
